Never let a phone call go unbilled again

Abillity™ is a unique app that automatically captures billable time spent on both desktop and mobile smartphones. Where traditional time-tracking tools fail, Abillity shines by allowing law firms and other businesses to recover billable hours and revenue from often forgotten, undocumented, or untimed calls.

Available for Android-based smartphones and coming soon to iOS, Abillity makes it easy to:

- **Reclaim lost time and revenue**

- **Capture and classify every call**
